Cover Letter

Dear iDelsoft Hiring Team,

I am applying for the Full-Stack Developer – Svelte, React & Node.js position. As a Senior Software Engineer based in Brazil with over 5 years of experience, I bring a background in web and mobile development, practical Svelte and Three.js experience, and fullstack delivery with Node.js. The opportunity to combine interactive interfaces, backend development, and technical ownership closely matches my experience and interests.

At MB Labs, I contributed to migrating a logistics ERP frontend from React CLI to Svelte. The rewrite made the code easier to maintain and reduced the application bundle size by 30%, improving initial load time. I also built a Three.js renderer within a React administrative dashboard, allowing administrators to zoom into chart details for a clearer view of individual items.

My experience also includes developing a mobile workout creation module using React Native, TypeScript, Supabase, Firebase, and Google OAuth. It enabled trainers to create and modify workouts that members could follow in the same app, increasing member engagement by 40% according to gym attendance reports. As Lead Software Engineer for a fullstack team, I helped define standards and supported development across Node.js, PostgreSQL, Prisma, GraphQL, and the React ecosystem, improving feature delivery speed by 4x.

Previously, at Elleven Tecnologia, I developed applications with React, Node.js, and MySQL, including a meal ticket application that reduced queue time from 35 to 8 minutes and a commission system that increased sales by 25%. These projects strengthened my ability to connect implementation decisions with measurable operational and product outcomes.

I would welcome the opportunity to bring this combination of frontend architecture, interactive visualization, backend experience, and team leadership to the role. I communicate in English at C1 level and value clear technical discussions and collaborative problem solving. Thank you for considering my application.

Sincerely,

Hiago Leão Ferreira
