Hiago Leão Ferreira

Senior Frontend Software Engineer | React & TypeScript

hiagolof@gmail.com | +55 77 98865 5327 | linkedin.com/in/hiago-leao | Bahia, Brazil

Summary

Frontend Software Engineer with over 5 years of experience building web and mobile applications with React and TypeScript. Hands-on experience with Vite, Feature-Sliced Design (FSD), internationalization (i18n), automated testing and TDD, and CI/CD. Combines technical leadership with measurable improvements in accessibility, rendering performance and user experience. English: C1.

Experience

Frontend Software Engineer
MB Labs | *Campinas, São Paulo, Brazil (remote)* *11/2022 – Present*

• Developed Knowledge Paths with React, Next.js and React Native, increasing learning-material consumption by 5x. Used Vite in most React web projects, including Knowledge Paths.

• Applied Feature-Sliced Design (FSD) in Allp Fit, a fitness application, while developing a feature for users to submit app feedback; organized feature boundaries to simplify code navigation.

• Worked with i18n across MB Labs projects; used native JavaScript APIs, Luxon and shared helpers for date/currency formatting, user-local time display and fixed-zone backend exchanges.

• Applied TDD and automated testing with React Testing Library, Jest and Vitest; used Playwright for web E2E testing and Detox for React Native E2E testing.

• Configured CI/CD checks for linting, TypeScript types and Jest/Vitest tests using Bitbucket Pipelines and GitHub Actions; also worked with Azure and automated deployment tools.

• Created an AI-agent skill for semantic HTML, heading hierarchy, alternative text and keyboard navigation with visible focus, improving average Lighthouse accessibility scores from 30 to 90 on the pages addressed.

• Profiled long-list rendering with React DevTools and implemented react-window virtualization, reducing re-rendering time by approximately 50%. Integrated Sentry and Crashlytics for earlier error detection and richer diagnostics; support reported 60% fewer user complaints.

• Acted as Lead Software Engineer for a full-stack team, helping define standards that improved feature delivery speed by 4x. Gathered team concerns in daily meetings and led focused architecture discussions.

• Refactored fintech onboarding, reducing new-user abandonment by 60%; developed a Refer & Earn frontend that increased user acquisition by 3x. Built an installment-payment frontend that reduced overdue payments by 80%.

Skills: React, TypeScript, Vite, Next.js, React Native, FSD, i18n, REST APIs, TDD, GitHub Actions, Azure

---

Full Stack Software Engineer
Elleven Tecnologia | *Vitória da Conquista, Bahia, Brazil (remote)* *01/2022 – 10/2022*

• Developed a meal-ticket application with React, React Native, Node.js and MySQL for Novo Horizonte, reducing issuance queues from 35 to 8 minutes.

• Built a commission tracking and withdrawal system with React, Bootstrap, Node.js and MySQL, contributing to a 25% increase in ticket sales.

• Developed an administrative bank-slip reconciliation module that made reconciliation 10x faster than the previous manual cash-counting process.

Skills: React, React Native, TypeScript, Next.js, Node.js, MySQL, Bootstrap

---

Bioinformatics Software Engineer Intern
Federal University of Bahia (UFBA) | *Vitória da Conquista, Bahia, Brazil (remote)* *07/2021 – 01/2022*

• Developed a full-stack web application for predicting transmembrane protein regions using React, TypeScript and Node.js, adopted by university researchers and students to support molecular biology research.

Skills: React, TypeScript, Next.js, Node.js, PostgreSQL

Education

Frontend Engineering – Rocketseat, Brazil (2021 - 2022)
BSc in Biotechnology – Federal University of Bahia (UFBA), Brazil (2017 - 2022)

Courses

Ignite React Track – Rocketseat
Complete API with AdonisJS 5, TypeScript, and TDD – Udemy
RESTful API with JavaScript, Node.js, TypeScript, Type**O**RM, etc. – Udemy

Languages

English: Full professional proficiency (C1)
Portuguese: Native
