Hiago Leão Ferreira

Senior Software Engineer | React, Next.js, React Native & TypeScript

hiagolof@gmail.com | +55 77 98865 5327 | linkedin.com/in/hiago-leao | Bahia, Brazil

Summary

Software engineer with over 5 years of experience building web and mobile applications with React, Next.js, React Native, and TypeScript. Led a full-stack team and built applications from scratch with React and Node.js. Contributed to an ERP frontend migration that cut bundle size by 30%, using Cursor and validating the rewrite with unit tests. Additional skills include Tailwind CSS.

Experience

Senior Software Engineer
MB Labs | *Campinas, São Paulo, Brazil (remote)* *11/2022 – Present*

MB Labs is a global fintech company specialized in financial technology and the development of high-performance digital systems and applications for the financial market. Founded in 2013 as a startup, the company currently has over 300 professionals spread across Brazil, transforming complex challenges into secure, scalable solutions that deliver real impact for businesses and individuals.

• Contributed to migrating a logistics ERP frontend from React CLI to Svelte, using AI assistance and implementing unit tests through a test-driven development workflow. The rewrite made the code easier to maintain and reduced bundle size by 30%, improving initial load time. Technologies used: Cursor, Jest, React Testing Library, React, Svelte, TypeScript, HTML, and CSS.

• Acted as Lead Software Engineer for a full-stack team, guiding development, monitoring progress, contributing code, and helping define development standards. This work improved team coordination and increased feature delivery speed by 4x. Technologies used: React, React Native, Vite, Node.js, Next.js, Prisma, PostgreSQL, MongoDB, Firebase, and GraphQL.

• Developed the frontend of a "Knowledge Paths" module within a course application, providing students with a visual roadmap of the lessons, exercises, and materials needed to complete the course. This feature increased student engagement and, additionally, boosted the number of materials consumed on the platform by 5x. Technologies used: React, Sass, Next.js, React Native, and Styled Components.

• Refactored the onboarding flow of a fintech mobile application to make it easier for new users to navigate and complete the process. The redesigned flow made onboarding more intuitive and reduced abandonment among new users by 60%. Technologies used: React, Sass, React Native, Kotlin, and Swift.

Skills: React, React Native, TypeScript, Next.js, Svelte, Cursor, Jest, React Testing Library, Node.js, Prisma, PostgreSQL, Expo, Firebase, GraphQL

Senior Software Engineer
Elleven Tecnologia | *Vitória da Conquista, Bahia, Brazil (remote)* *01/2022 – 10/2022*

Elleven Technology is a company focused on leading technological solutions for the transportation and mobility sector. With a united team, the company seeks to learn, foster creativity, and make a difference through intelligent and efficient systems.

• Developed a mobile application from scratch for issuing meal tickets, which streamlined the daily meal ticket issuance process for workers at the bus company Novo Horizonte. This application reduced queue time for ticket issuance from 35 to 8 minutes; utilized React, Bootstrap, React Native, Node.js and MySQL.

• Developed a commission processing and withdrawal system for ticket sales, which helped bus ticket sellers at Novo Horizonte gain better visibility into the commissions earned from each sale and allowed them to withdraw accumulated funds whenever they wished. This feature encouraged sellers to serve customers better and increased sales by 25%; utilized React, Bootstrap, Node.js and MySql.

• Developed a module that allowed administrators at Novo Horizonte to manage money received via paid bank slips, which sped up the reconciliation time by 10x compared to previously receiving cash and counting manually; utilized React, Vite, Bootstrap, Node.js, and MySQL.

Skills: React, React Native, Next.js, TypeScript, Node.js, MySQL, Bootstrap, Vite

---

Software Engineer Intern (Bioinformatics)
Federal University of Bahia (UFBA) | *Vitória da Conquista, Bahia, Brazil (remote)* *07/2021 – 01/2022*

• Developed a full-stack web application from scratch for predicting transmembrane regions in proteins, which was adopted by university researchers and students as their analysis tool, accelerating their molecular biology research and improving research development efficiency; utilized React, TypeScript and Node.js.

Skills: React, Next.js, TypeScript, Node.js, PostgreSQL

Education

Frontend Engineering – Rocketseat, Brazil (2021 - 2022)
BSc in Biotechnology – UFBA - Federal University of Bahia, Brazil (2017 - 2022)

Courses

Android App Development using Kotlin – Udemy
Ignite React Track – Rocketseat
Complete API with AdonisJS 5, TypeScript, and TDD – Udemy
RESTful API with JavaScript, Node.js, TypeScript, Type**O**RM, etc – Udemy

Languages

English: Full professional proficiency - C1
Portuguese: Native
