Hiago Leão Ferreira

Senior Frontend Software Engineer

hiagolof@gmail.com | +55 77 98865 5327 | linkedin.com/in/hiago-leao | Bahia, Brazil

Summary

Frontend Software Engineer with over 5 years of experience building web and mobile applications with React, React Native, and JavaScript. Experienced in API integration, reusable interfaces, state management with Redux and Zustand, and frontend performance. Led a fullstack team, reviewed frontend pull requests, supported test coverage, and investigated Sentry errors. Delivered fintech improvements that reduced onboarding abandonment by 60% and increased user acquisition by 3x, alongside an educational module on a platform serving more than 1,000 users.

Experience

Senior Frontend Software Engineer
MB Labs | *Campinas, São Paulo, Brazil (remote)* *11/2022 – Present*

MB Labs is a global fintech company specialized in financial technology and the development of high-performance digital systems and applications for the financial market. Founded in 2013 as a startup, the company currently has over 300 professionals spread across Brazil, transforming complex challenges into secure, scalable solutions that deliver real impact for businesses and individuals.

• Acted as Lead Software Engineer for a fullstack team, guiding development, defining standards, reviewing frontend pull requests, supporting test coverage, and investigating errors reported by Sentry. This helped organize the team and improve feature delivery speed by 4x. Technologies used: React, React Native, TypeScript, Redux, Git, Sentry, Vite, Node.js, Next.js, Prisma, PostgreSQL, MongoDB, Firebase, and GraphQL.

• Developed the frontend of a Knowledge Paths module for a course application serving more than 1,000 users, giving students a visual roadmap of lessons, exercises, and learning materials. The feature increased student engagement and boosted material consumption by 5x. Technologies used: React, Next.js, React Native, Sass, and Styled Components.

• Refactored the onboarding module of a fintech mobile application, improving the user experience to make the onboarding flow more intuitive and fluid. The changes reduced onboarding abandonment by 60% among new users. Technologies used: React, React Native, Sass, Kotlin, and Swift.

• Developed the frontend of an installment payment module for a real estate application, helping clients view paid and upcoming financing installments. This improved payment visibility and reduced overdue payments by 80% compared with bank slips sent only by email or mail. Technologies used: React Native and Styled Components.

• Developed the frontend of a Refer and Earn module for a fintech application, enabling users to refer new customers to the bank and earn points. The feature increased user acquisition by 3x. Technologies used: React and React Native.

• Performed maintenance on multiple legacy systems and refactored existing code to address bugs and improve application performance. This work reduced bug incidence and supported ongoing improvements to the applications. Technologies used: React, React Native, Kotlin, and Swift.

Skills: React, React Native, TypeScript, Redux, Git, Sentry, Next.js, Vite, GraphQL, HTML, CSS, Sass, Styled Components

---

Senior Frontend Software Engineer
Elleven Tecnologia | *Vitória da Conquista, Bahia, Brazil (remote)* *01/2022 – 10/2022*

Elleven Technology is a company focused on leading technological solutions for the transportation and mobility sector. With a united team, the company seeks to learn, foster creativity, and make a difference through intelligent and efficient systems.

• Developed a module for administrators at Novo Horizonte to manage money received through paid bank slips, improving the reconciliation process. The solution accelerated reconciliation by 10x compared with receiving cash and counting it manually. Technologies used: React, Vite, Bootstrap, Node.js, and MySQL.

• Developed a commission processing and withdrawal system for ticket sales at Novo Horizonte, giving sellers visibility into commissions earned from each sale and allowing withdrawals of accumulated funds. The feature encouraged better customer service and increased sales by 25%. Technologies used: React, Bootstrap, Node.js, and MySQL.

Skills: React, React Native, TypeScript, Bootstrap, Vite, Node.js, MySQL

Bioinformatics Software Engineer Intern
Federal University of Bahia (UFBA) | *Vitória da Conquista, Bahia, Brazil (remote)* *07/2021 – 01/2022*

• Developed a full-stack web application for predicting transmembrane regions in proteins, providing an analysis tool adopted by university researchers and students. The application accelerated molecular biology research and improved research development efficiency. Technologies used: React, TypeScript, and Node.js.

Skills: React, TypeScript, Node.js, PostgreSQL

Education

Frontend Engineering – Rocketseat, Brazil (2021 - 2022)
BSc in Biotechnology – UFBA - Federal University of Bahia, Brazil (2017 - 2022)

Courses

Ignite React Track – Rocketseat
Complete API with AdonisJS 5, TypeScript, and TDD – Udemy
RESTful API with JavaScript, Node.js, TypeScript, Type**O**RM, etc – Udemy
Android App Development using Kotlin – Udemy

Languages

English: Full professional proficiency - C1
Portuguese: Native
